Hands-on experience with SAP Enterprise Threat Detection

Kevin Schwab, SAP
Michael Schmitt, SAP

October 2026

SAP TechEd

Agenda

01 Introduction SAP Enterprise Threat Detection, cloud edition

02 SAP Enterprise Threat Detection, (public) cloud edition for Private/Public Cloud SAP Landscapes

03 Short Demo/Preview

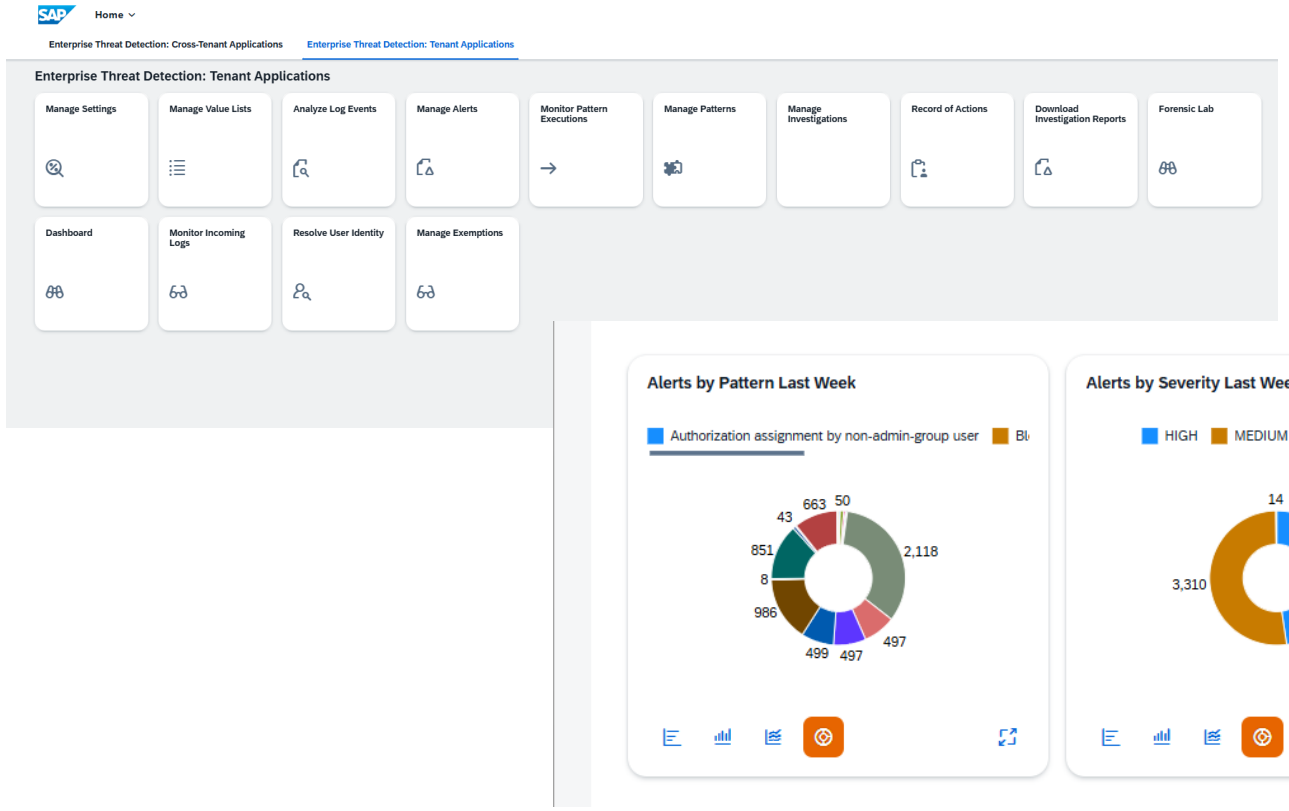

- Starting UI
- Dashboards (preview)
- Alerts
- Forensics

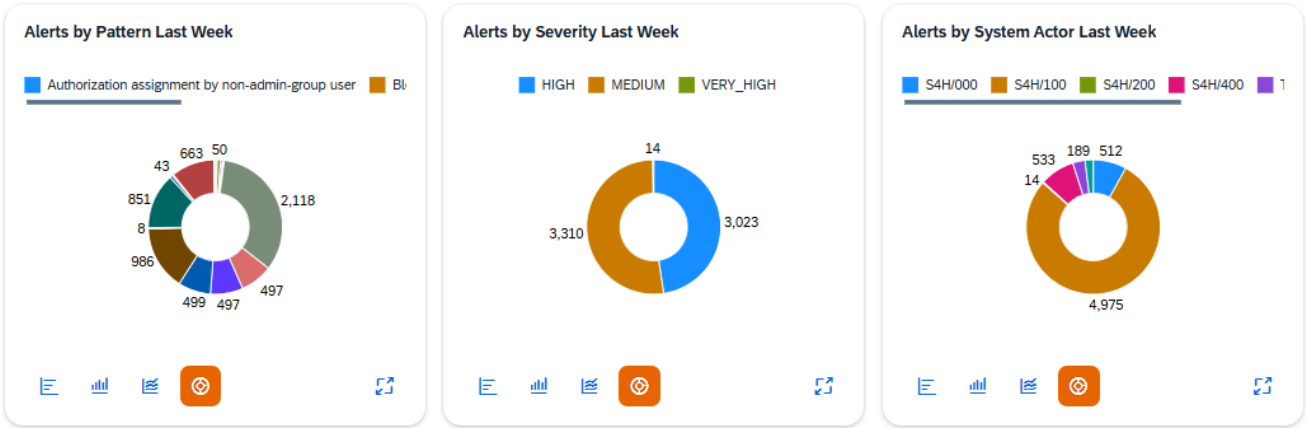

Introduction
SAP Enterprise Threat Detection, cloud editon

SAP Enterpise Threat Detection

SAP Enterprise Threat Detection raises alerts in (near-) real-time, if security/compliance relevant suspicious activities happen in the application layer of your SAP landscape.

Use case categories

Use of critical resource

- Execution of critical functions, reports and transactions
- Change, manipulation or spy out of business data
- Change or manipulation of critical configuration

User Manipulation

- Critical authorization assignment
- User role create, drop or manipulation
- Reference user assignment
- User morphing by changing type or probable identity theft

Debugging

- Debugging with change of control flow while debugging
- Debugging with change of variable values during debugging
- Debugging in critical systems
- Debugging in systems assigned to critical roles

System Access

- Failed logon with too many attempts
- Failed Logon with too many password logon attempts
- Logon with SAP standard users, or high privileged users

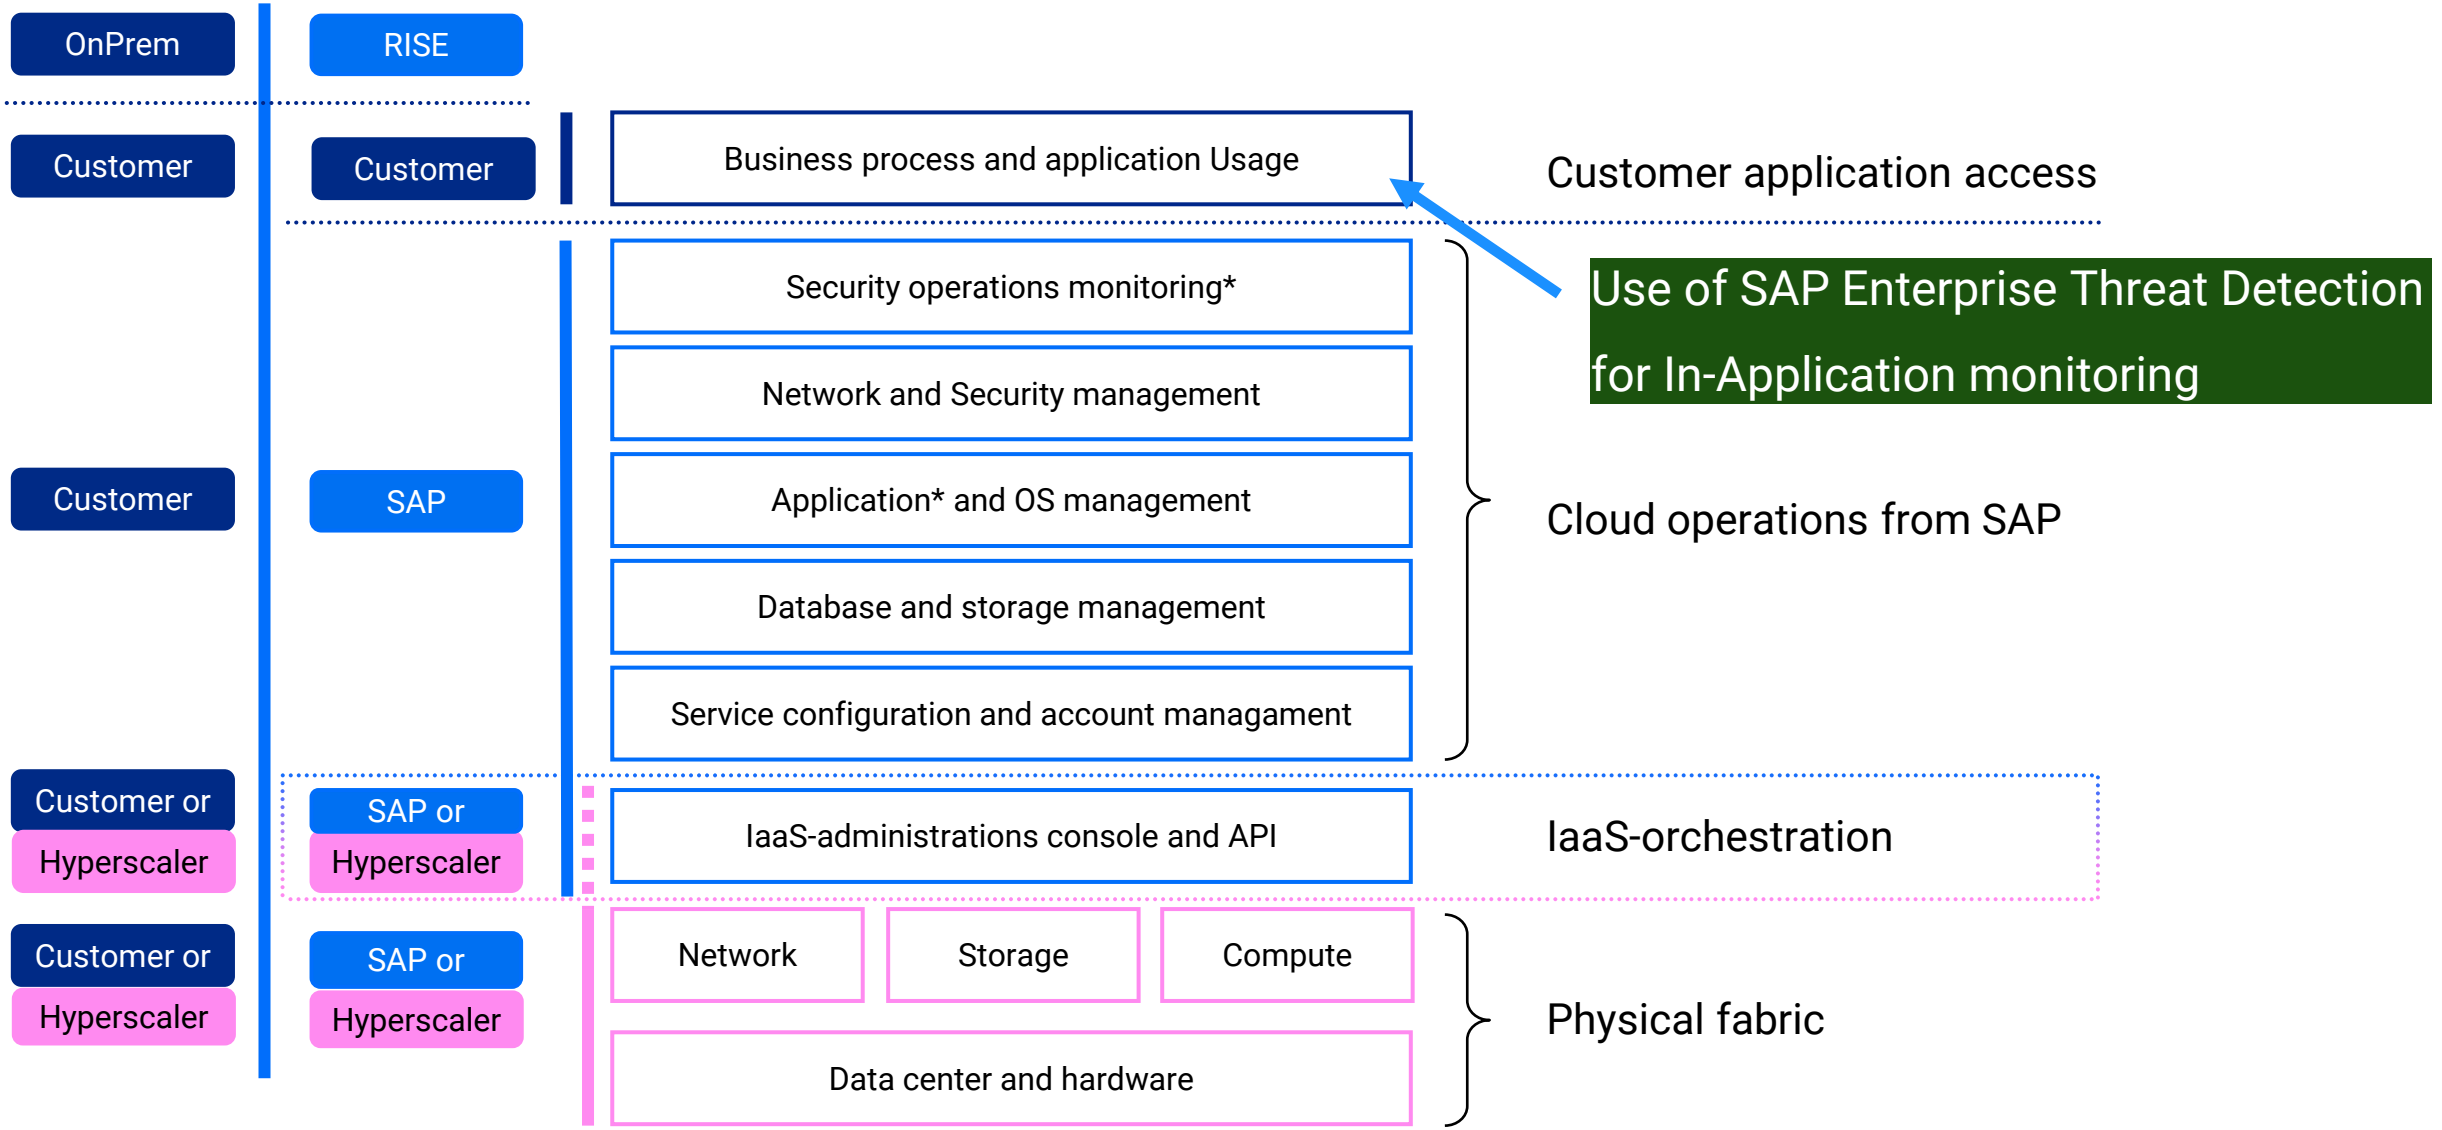

Suspicious Actions

- Dynamic program execution, download
- Dynamic code and system changes

SAP Enterprise Threat Detection, (public) cloud edition for Private/Public Cloud SAP Landscapes

SAP S/4HANA: Responsibilities (OnPrem vs. RISE)

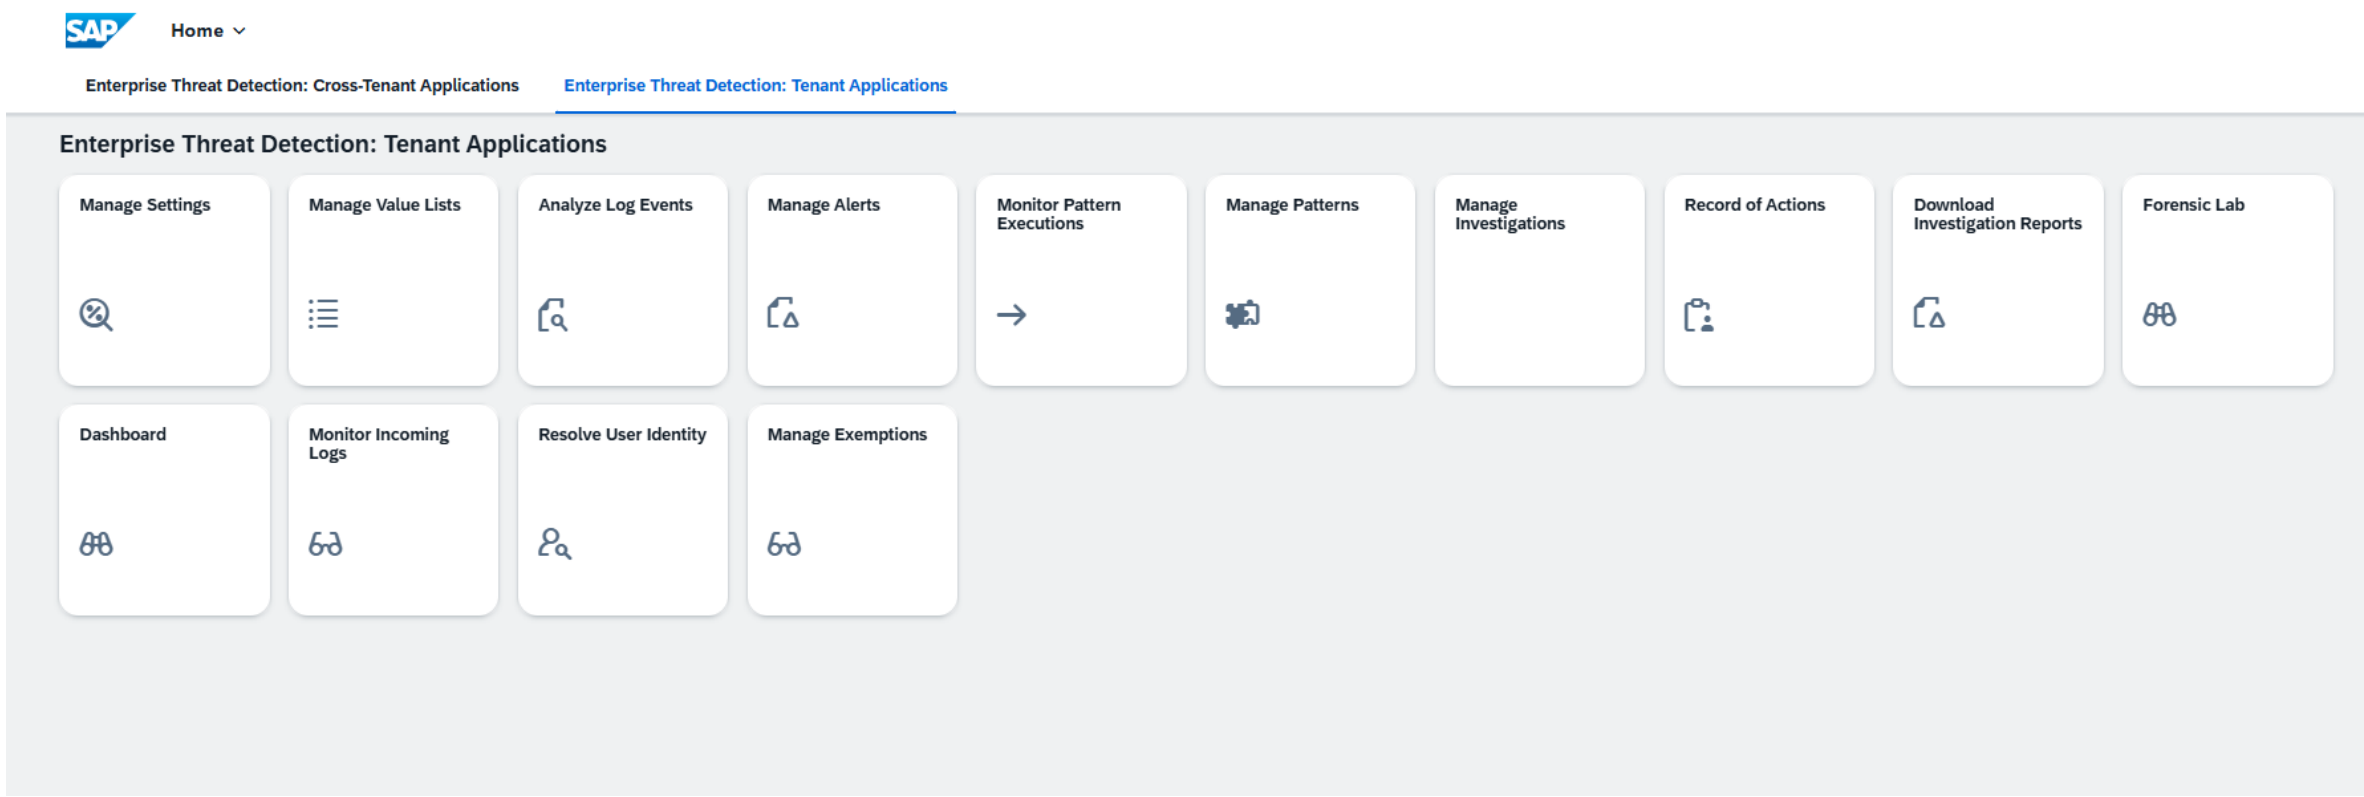

*Rolls and responsibilities will vary depending on deployment (private, public).

Short Demo/Preview

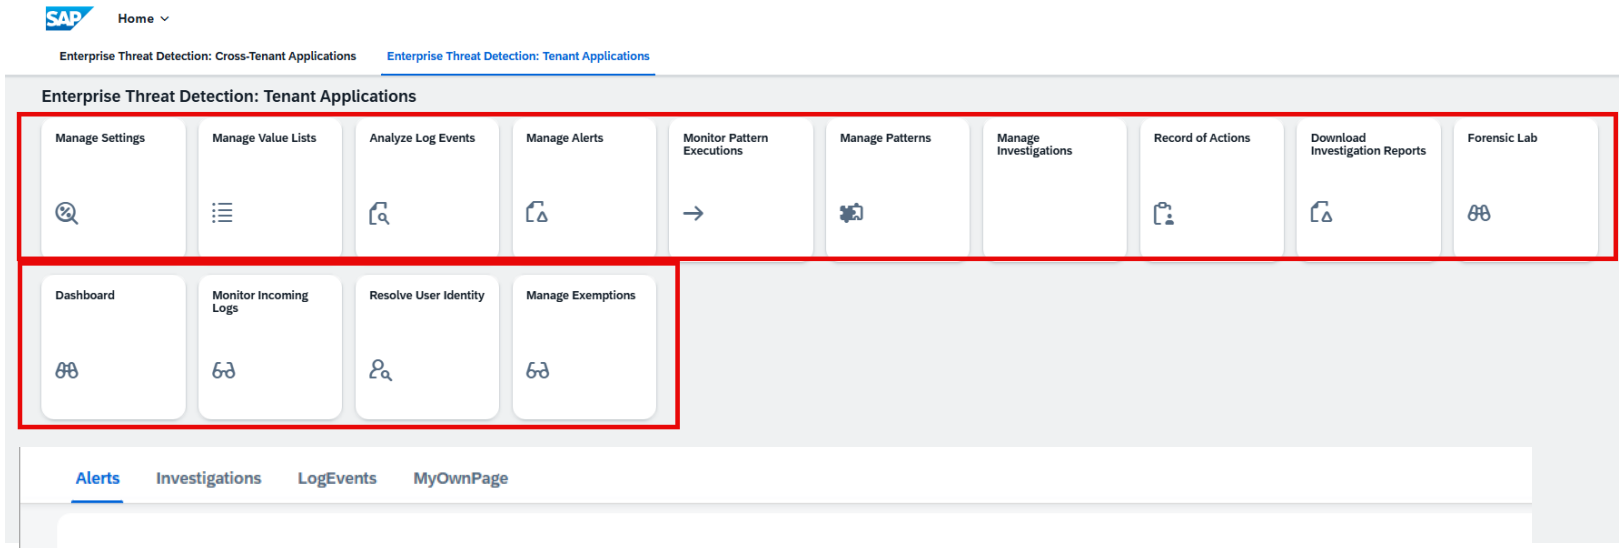

Security Analyst View/Partner View

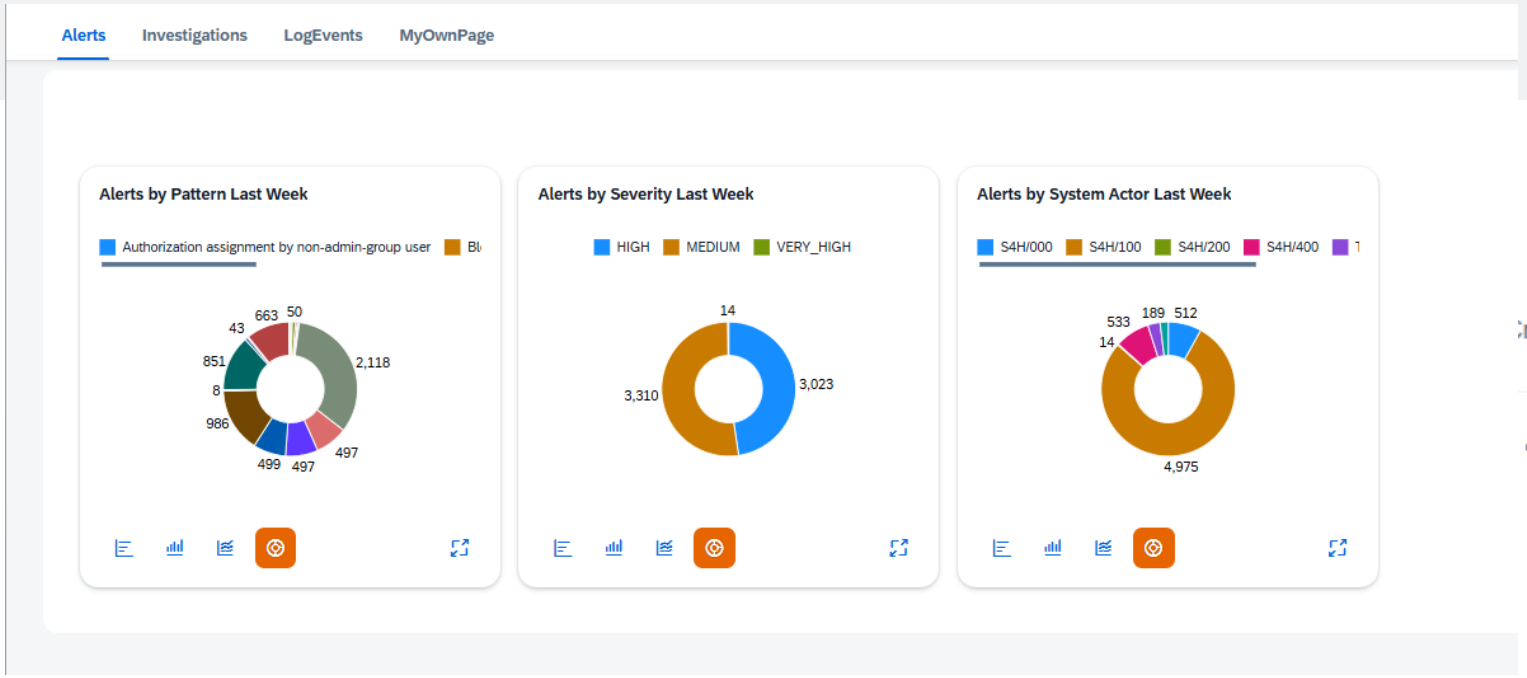

The Security Analyst

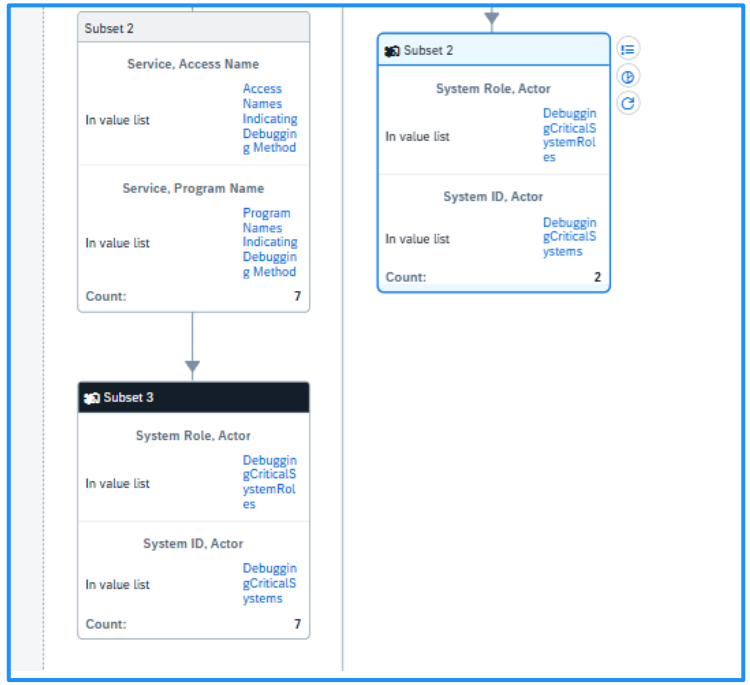

- does alert processing, deep dive analysis, new use case creation, …
- has a lot of tools at hand to do his job
